## **DETAILED ACTION**

### ***Statement of Reasons for Allowance***

Claim 4 recites a lubricant composition comprising an N-substituted triazine. Beiersdorf AG discloses the N-substituted triazine, while Emert discloses the use of N-substituted triazines as antioxidants in lubricant compositions. However, Beiersdorf AG specifically discloses the triazine as a UV-filter in a cosmetic or dermatological composition. One of ordinary skill in the cosmetic or dermatological art would not have looked to the lubricant reference of Emert to find a use for the triazine, nor would one of ordinary skill in the lubricant art have looked to the cosmetic or dermatological reference of Beiersdorf AG to find suitable N-triazines for use as antioxidants in lubricating compositions. Therefore, the combination of Beiersdorf AG and Emert is not tenable.

The nearest prior art compound to those recited in claims 7-10 is found in Heidenfelder (US.PG Pub. No. 2003/0124158), paragraphs 179-193, but R groups disclosed in the reference do not match those of Claims 7-10. Additionally, claim 10 depends from the allowable claim 4. A STIC structure search was also performed, and did not find any applicable art.
